

The Do Not Call list was the best Consumer Protection Act that the State of NJ has ever implemented. My privacy is finally being protected with this act. I can now come home from work at night and not have to worry about being harassed by telemarketers and unwanted calls. I don't need someone calling me to sell a product that I may or may not need. If I need something I can simply go online and purchase it myself at my own convenience. I don't need harassing, stressful calls that really make my life miserable. I don't even want to hear from companies that I recently purchased merchandise from in the last 18 months. So I am totally in favor of more stringent laws regarding the Do Not Call List in the state of NJ.
